## **DUAL motor option available**

The Dual Motor actions both lift and tilt the Recliner forwards so that getting in and out is the easiest thing imaginable. This full powerlift facility is designed to assist sufferers of arthritis, rheumatism, MS, poor circulation and many other mobility restrictions.

The sophisticated Dual Motor mechanism enables you to control the backrest and footrest independently to reach the exact position you want including a near-horizontal full sleeping position (needs a 38cm (15") gap from the wall).

Designed with full powerlift facility to assist sufferers of arthritis, rheumatism, MS, poor circulation and many other mobility restrictions.

5 YEAR GUARANTEE on all Recliner actions, frames, motors, handsets and all other electrical parts.

Optional LUMBAR ADJUSTMENT for added comfort.

Single-use Emergency Back-up fitted as standard and Multi-use Battery Back-up available at extra cost.

Supplied with castors for ease of movement. Front castors lift away to ensure stability in raised positions. Glides now available as an alternative to castors for solid flooring.

Supplied with removable back to make the task of delivering the Recliner into your home so much easier.

Maximum recommended weight 160kg (25 stone).
