

Baron Dining Table

The BARON table contains a handy mechanism able to increase the top surface. Pull the frame towards you so that the two legs with hidden castors slide on one side allowing the leaf to be pulled out.

With a simple rotation the leaf fitted on metal tracks comes out of its housing and lines up with the top. The triangular or rectangular legs stay at the perimeter, ensuring maximum individual comfort for all guests.

Choose between a ceramic top and a tempered glass top, with a metal frame and legs – in choice of finish.
